

# YOUTH RUGBY INJURY SURVEILLANCE PROJECT ROADMAP

**END OF SEASON** 

#### **PRESEASON**

## INITIAL CONTACT

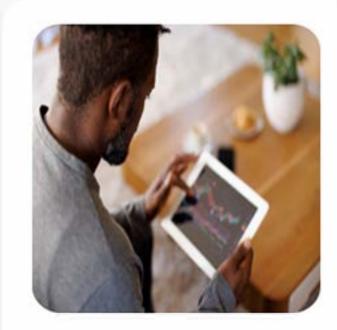

You will be contacted by UoB Researchers who will provide your School/Club information on the project.

#### CONNECT

Research team connects with rugby department & school management to ensure optimal awareness of data useage and consent process.

# DATA COLLECTION

Template is sent to a team representative (e.g., coach, team physio etc). Consent form links sent to be distributed to players and guardians via team representative and complete at start of season.

## **DURING SEASON**

## RECORD

Team representative to record match information and injury data on data collection template throughout the season. Regular contact from research team to retreive data, with support as needed.

## **END OF SEASON**

Final collection of remaining data. Verification of data collected including checking consents have been recieved by UoB.

## FEEDBACK

End of season report will be written by the research team which highlights injury information from the season. You may request a report that compares your school to the national data if you have provided complete data sets.

**ASK US ABOUT OUR** INFORMATION WEBINARS This project has been granted favourable approval from the University of Bath. For further details please contact the University of Bath youth surveillance research team: rfu-youth@bath.ac.uk.
